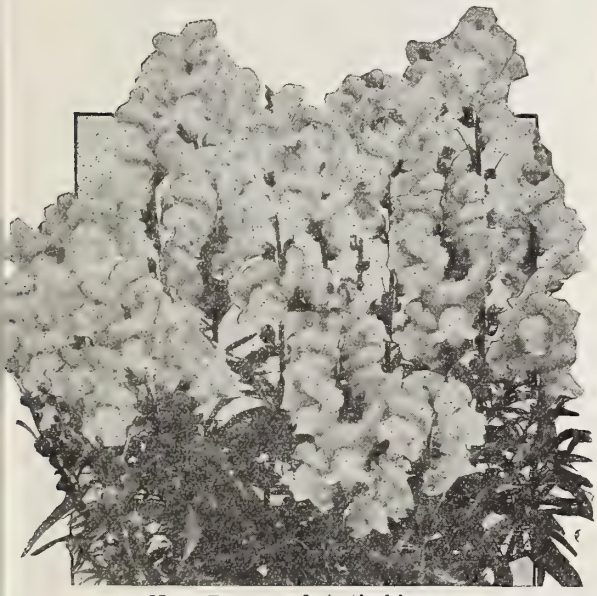
Novelties and Specialties in FLOWER SEEDS

The florist who fails to pay special attention to the many splendid new flowers misses a wonderful chance to present to his customers many worth-while new things which always sell well and usually bring a price considerably higher than that procurable from ordinary flowers. The novelties which we have grouped together on these pages are all outstanding in one way or another. No florist can afford to pass them by. They represent the finest of the new things for 1938; but there also are the best newer kinds of recent years. Take advantage of the opportunity to offer to your customers these new and improved varieties.



New Rustproof Antirrhinum

New Rustproof Antirrhinum

The careful work done in order to develop these strains of Rustproof Antirrhinum has proved a tremendous success as now it is possible to grow these flowers with the assurance that fully 75% of the plants will not be affected by Snapdragon rust.

Maximum Varieties

This strain has proved one of the most popular because of its vigorous growth and showy appearance. The plants reach a height of 3 feet and more with mammoth blooms artistically arranged on fine, strong, and long flower spikes. There are now available a number of very choice colors.

Alaska. A very attractive variety, and more floriferous than Maximum Snowflake, bearing 12 to 14 base-branching flower spikes set with lovely white blooms of enormous size.

Campfire. This is a distinct new color in Antirrhinum—a pure luminous scarlet, free from any orange or bluish shades.

Canary Bird. Vigorous plants having 12 to 14 non-lateral stems closely set with appealing bright canary yellow blooms.

Copper Shades. Each plant carries 12 to 16 long vigorous spikes set with magnificent blooms in varying shades of copper, ranging from coppery old gold to brilliant copper-orange.

Crimson. The combination of fiery crimson flowers, dark green foliage, and dark plum-colored stems is indeed very striking. A vigorous grower.

Loveliness. Pure soft rose-pink blooms that are an expression of loveliness. Produces 12 to 16 splendid spikes to a plant.

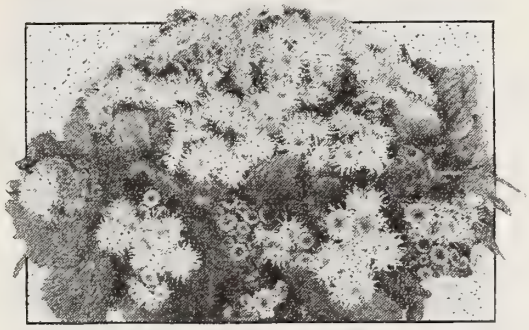
Any of the above: Tr. pkt. **50c; oz. $2.50**

Mixed. Contains all the rustproof Maximum varieties of Snapdragons so far available. Tr. pkt. **30c;** oz. **$1.50.**

Majus grandiflorum

Mixed. Another excellent mixture of the Majus grandiflorum type. There are many splendid colors represented in this and the careful work done with it has resulted in 75% of the plants being rustproof. Tr. pkt. **25c;** oz. **$1.00.**

New Dwarf Ageratum



Ageratum, Dwarf Compact Fairy Pink

Blue Ball Improved (Blue Boy). Of even compact growth smothered with flowers of the richest shade of blue. Tr. pkt. **50c;** ¼ oz. **$1.25;** oz. **$4.00.**

Dwarf Compact Fairy Pink. An exceptionally dwarf compact variety, 5 inches high, covered with salmon pink blooms. Tr. pkt. **50c;** ⅛ oz. **$1.00.**

Two New Aquilegia—Columbine

Aquilegia clematiflora

Clematiflora (The Clematis-Flowered Columbine). Entirely distinct having no spurs which gives the flowers a resemblance to those of a Clematis. Of medium height, free blooming, and very colorful. Tr. pkt. **$1.00.**

Long-Spurred Crimson Star. A very fine large-flowered long-spurred new Aquilegia of a deep coppery crimson color. Grows 18 inches high and produces a great abundance of magnificent blooms. Tr. pkt. **50c;** ⅛ oz. **$1.00.**

Three Outstanding Newer Asters

Super Giant Los Angeles

This outstanding, giant-flowering variety received an Award of Merit, 1934 All America Selections. It is a giant in size and has fully double blooms that measure 6 to 8 inches across. The gracefully and delicately interlaced flower petals give it an airy charm. The color is a beautiful shell pink. Of magnificent tall growth. Tr. pkt. **40c;** oz. **$2.00.**

Super Giant El Monte

This splendid Aster gives us an equally vigorous and free-flowering variety as Los Angeles with blooms which are fully as large and handsome. The color is rich deep glowing crimson. As it is a non-lateral variety which branches from the base, it yields plenty of cut flowers. Tr. pkt. **40c;** oz. **$2.00.**

Aurora Golden Sheaf W-R

An outstanding wilt-resistant Aster giving a most appealing novel effect. The double blooms have a full cushioned crest-like center, set off beautifully by a single row of short ray petals. 100 Years

Starting one hundred years ago, Henry A. Dreer has grown steadily until today it enjoys an envious reputation as a leader in the Horticultural business. Dreer's Quality, Seeds, Plants, and Bulbs are the choice of several hundred thousands of gardeners who realize the tremendous importance of choosing for their source of supply an establishment which has proved its dependability over a period of a century.

Dreer's Famous American Asters

W.R. = Wilt-Resistant Asters

Seeds of these are from plants grown in sick soil and proved immune to disease. They are invaluable in those sections where wilt is prevalent. With them Asters can be grown in the same ground year after year. We are confident our patrons will find them a profitable investment.

The deepest yellow of all Asters. Has fully double flowers representing a comparatively new type in that they are composed of several rows of short ray petals surrounding a full crest-like center cushion. It has been greatly admired at all flower shows where it was exhibited during the last year or two. Comes perfectly true and is wilt resistant. Tr. pkt. **40c**; oz. **$2.00.**

This is the reddest of all red Asters, the color being a rich garnet or ox blood red which glistens in the sunshine like a live coal. The plants are of free-branching habit, about 18 inches high. The very double flowers average 3½ inches across. Tr. pkt. **30c**; oz. **$1.50.**

Dreer's "Peerless Pink" Aster

Dreer's "Peerless Pink" Aster (W.R.)

The finest pink commercial Aster ever introduced. Almost globular flowers, rarely under 4 inches across and frequently over 5 inches. The color is rich shell pink. Similar in shape but more decided than the late branching. The center petals are prettily incurved while the wide outer petals reflex making a most artistic and finely finished flower. Stands cut longer than any other. Tr. pkt. **30c**; oz. **$1.50.**

New Super-Giant Aster, Los Angeles

Los Angeles is the first of a new super-giant race of beautiful Asters. The flowers are full-petaled and unusually large. Tr. pkt. **40c**; oz. **$2.00.**

New Super Giant Aster, El Monte

A magnificent new color—deep glowing crimson. Very large fluffy blooms composed of a mass of daintily interlaced plume-like petals and borne on heavy non-lateral stems. An early bloomer remaining in flower for a long time. Tr. pkt. **40c**; oz. **$2.00.**

Asters should not be grown in the same soil two years in succession unless Wilt Resistant varieties are planted.

Beauty Asters

This type is most valuable on account of its late flowering, coming into bloom fully two weeks later than our Superb Late Branching and furnishing high-grade cut flowers from early October until killing frost in November. The plants are unusually vigorous. They grow from 2½ to 3 feet high and bear a great quantity of perfect blooms.

W. R. = Wilt-Resistant Asters

The development of Wilt-Resistant Asters represents one of the greatest advances ever made through plant selections. Years of painstaking and careful work were required to develop Wilt-Resistant varieties which make it possible to grow good Asters on soil infected with wilt disease. The seed we offer, of varieties marked W.R., has been gathered from plants that have proved immune to the organism which causes fusarium wilt.

Growers must realize that wilt of Asters is caused by an entirely different organism than Aster Yellows. Where Aster Yellows interfere with growing a good crop of flowers it will be necessary to grow the crop under a protection of Aster cloth which prevents leaf hoppers and other sucking insects from carrying the disease virus from weeds of adjacent fields to your Aster plants.

Even where Asters are grown in Aster cloth houses it is essential to use Wilt-Resistant strains wherever there is danger that the wilt organism is present in the soil.

Dreer's Late Branching Aster

Late Branching Asters

An outstanding type of Asters for late August and September blooming.

The plants form strong, well-branched bushes, 2 to 2½ feet high, bearing on long, strong stems their handsome Chrysanthemum-like flowers. The form of the flowers together with the length of the stems place them at the head of Asters for cutting. They are at their best during September.

DREER'S SELECT DAHLIAS

We submit to the trade a list of substantial, well-tried varieties of Dahlias including a few of the many recent introductions.

Hundreds of temporarily popular varieties have been tried and discarded because we did not consider them of sufficient merit to displace older, well-tried sorts in our gardens.

The tubers offered are strong divisions of field clumps and are ready for immediate delivery.

Plants, where offered, are from three-inch pots ready for delivery in May, the proper planting time.

We are paying particular attention this year to the popular Miniature and Pompon Dahlias.

Gardeners who want to ornament their home grounds and also have suitable cutting material for house decoration have become increasingly fond of these smaller types. We offer up-to-date selections.

DREER'S SELECT

Hardy Perennial Plants

Specially Grown in Pots for Outdoor Planting

The majority of the stock offered is pot grown. This does not mean that the plants have been altogether pot grown but that they have been field grown, dug, and potted up during the fall months. Such stock can be planted even late in the spring with practically no loss, whereas clumps seldom do well when planted late in the season. Our experience has been that a vigorous pot plant of proper size will, in nearly every case, give quicker and better results than the best so-called "field clumps."

Hardy Garden Chrysanthemums

2-inch pots—Ready in March

Gorgeous autumn-flowering plants producing a lavish profusion of colorful blooms just at a time when most other plants are past or failing. They are reasonably hardy if planted in a well-drained soil and covered with light litter during the winter. We offer strong young plants which will produce full-sized flowering clumps for the coming fall.

For a quarter of a century we have been selecting and producing new varieties of Hardy Chrysanthemums, constantly endeavoring to increase their desirability and usefulness for garden display.

As new, better and hardier varieties appear, we are obliged to discard some of the older ones. You may rest assured that the new ones selected in the same colors have qualities of superiority justifying their trial and adoption by you.

Two New Azaleamum Chrysanthemums

The great popularity of Chrysanthemum Amelia, also known as Azaleamum and Pink Cushion, has caused strenuous efforts to secure the same type of plant with other colors. After trying a number of varieties, we have found the following worthwhile and practically of the same habit as Amelia.

King Cushion. Identical with Amelia excepting that the flowers are deep bronzy salmon with a suffusion of rose.

Queen Cushion. The same as the above with pure white flowers.

Either of the above, 2-inch pots:
$1.00 per doz.; **$8.00** per 100

Korean Hybrid Chrysanthemums

Korean Hybrid Chrysanthemums, first offered a few years ago, enhance the attractiveness of this class of plants by adding greater hardiness and much grace to the assortments previously in commerce.

Since their first introduction there have been many improvements and variations, all worthwhile. We recommend this type heartily with full confidence in their giving you much useful service.

Six Original Korean Hybrids

These six varieties, which heralded a new race for our gardens, are still very much worthwhile. They remain distinct and full of charm.

Apollo. Bronze, red, and gold combination suffused glowing salmon.

Ceres. Old gold blended with yellow and dusted coppery bronze.

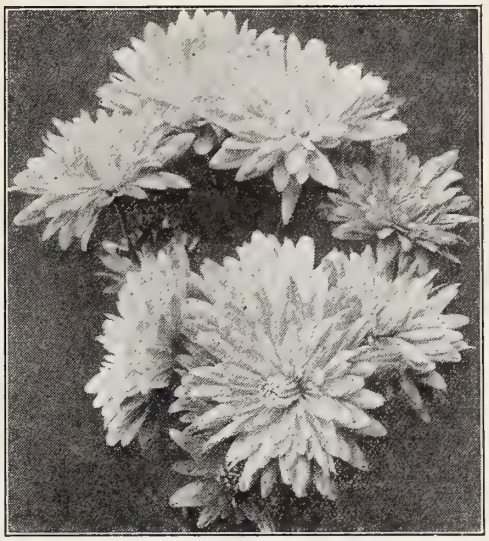
Daphne. Splendid pink with a sheen of lilac-rose.

Diana. Triple ray petals of rose-pink suffused with lilac-rose and salmon.

Mars. Deep amaranth red changing to wine red with velvety sheen.

Mercury. Opens a bronze red, gradually changing to coppery bronze.

Any of the above, 2-inch pots:
$1.00 per doz.; **$8.00** per 100



Chrysanthemum Rapture

Dreer's Achievement Collection of Hardy Chrysanthemums for 1938

Rapid strides have been made in the production and introduction of improvements in Hardy Chrysanthemums during the past few years. We are proud of the fact that we have been able to make very considerable contributions to this advance.

The eighteen varieties offered on this page are the climax to years of successful efforts, representing a large range of desirable colors and a diversity of graceful form among flowers. The blooms are produced on vigorous, hardy plants. This set of varieties of our own introduction is a source of pride to us, and we know they will add greatly to your enjoyment of your garden. Seven of the varieties, marked *, are Korean Hybrids.

Aglow. Double flowers of deep bright orange color. Very brilliant.

Red Hussar. Duplex flowers of brightest scarlet-crimson on bushy, compact plants. One of the most brilliant.

Sensation. Single yellow with every petal tipped scarlet. Very showy and reliable.

Giant-Flowered Althea

William R. Smith. Everyone will be pleased with this splendid variety. The habit of the plant is ideal, naturally forming attractive, symmetrical, bushy specimens, while the glistening pure white flowers are of giant size. They open out flat or salver-shaped, quite different from the older types and are produced in great profusion from early in July until late in September.

Strong 3-year-old plants, bushy, 24 inches high, **$3.50** per doz.; **$25.00** per 100.

Andromeda—Pieris

Buddleia—Butterfly Shrub, Summer Lilac

New Pink Buddleia
Charming

Probably the most outstanding new plant offered this season, having created a sensation when first exhibited by us. It was given the highest award, a Silver Medal, by the Pennsylvania Horticultural Society. Truly a glorious shrub bearing throughout the late summer and autumn elegant long sprays covered with lovely lavender-pink blooms which compared with other Buddleias introduced up to date are distinctly pink. For September and October flowers we suggest pinching off the flower spikes in July, which will result in vigorous new growth bearing showy terminal flower trusses during the autumn months.

Judging from the tremendous interest shown in this new Buddleia we feel confident that it merits the highest recommendations and we suggest to you a good size planting in order to derive your share of the profits to be had from this plant during the coming season. 3-inch pots, ready early in April, **$4.00** per doz.; **$30.00** per 100.

Lining out stock, ready April 15, **$18.00** per 100; **$150.00** per 1000.

Ile de France

This fine Buddleia, a French introduction, has quickly replaced the older varieties of this shrub which have been popular for so many years, because it is superior, not only in its brilliant coloring but the flower spikes are longer and more graceful. The plants also are of a better, more uniform shape.

The plant attains a height of from 3 to 4 feet, forming a symmetrical, bushy shrub. Every branch is terminated by a graceful, cylindrical spike 6 to 9 inches long. The fragrant flowers are brilliant rosy violet-purple. In bloom from the latter part of July to late in September.

3-inch pots, **$2.50** per doz.; **$15.00** per 100.

Truehedge Columnberry
Berberis Thunbergi pluriflora erecta

U. S. Plant Patent No. 110

A very desirable new Barberry which makes a beautiful upright growth that gives it exceptional value for semi-formal hedges. The leaves are larger and thicker than the Japanese Barberry and they are deeper green, glossier, and distributed in such a way as to give splendid density to the planting. The fall coloring of Columnberry also is richer and deeper than that of the common Barberry. Trimmed into hedge it gives a particularly fine effect. Its hardiness and immuneness to rust makes it as desirable for northern sections as in warmer climates. Fruits remain on the plant for a long time.

9 to 12 inches high **$2.00** per doz.; **$12.50** per 100.
12 to 15 inches high **$2.75** per doz.; **$18.00** per 100.
15 to 18 inches high **$3.50** per doz.; **$25.00** per 100.

We make no charge for boxes or packing.

The dwarfer varieties are nearly evergreen and while especially adapted for rockery plantings are equally effective planted in clumps in front of the shrubbery border or mixed with the dwarfer broad-leaved evergreens.

Horizontalis. A low-growing shrub with almost horizontal branches. Small shiny green leaves and orange-red berries produced in great quantity. One of the most effective evergreen plants for rockery or border planting.

Praecox. A new Chinese variety with glossy foliage and large red berries by the end of June.

Any of the above in strong, 5-inch pots: **60c** each.

Daphne cneorum—Garland Flower

A pretty, dwarf, spreading shrub from 6 to 8 inches high, valuable for the rockery or for the front of the border. Has beautiful bright pink, sweet-scented flowers early in May. Strong bushy plants 8 to 10 inches in diameter. **75c** each; **$7.50** per doz.; **$60.00** per 100.

Elsholtzia Farquhari

This plant has the nature of the well-known Buddleia, but it grows only 24 inches high producing large, showy spikes of bright pink flowers in late summer and early fall. The entire bush, flowers and foliage, is sweetly scented. In addition to being very conspicuous in the landscape the plant also is outstanding for cutting and deserving of much more attention than ordinary plant material. We highly recommend this for cut flower purposes or for landscape planting. Strong field-grown plants **35c** each; **$3.50** per doz.; **$25.00** per 100.

Erica—Heath

Most of these Heaths are compact, low-growing, and extremely useful for rockeries. The small foliage is densely arranged around the wiry stems, and both in full bloom or in mid-winter they make a very pretty picture. Give some protection the first winter to acclimate them. Semi-shady location.

Vagans (Cornish Heath). Compact evergreen shrub with dark green small foliage and pale purplish red flowers in August and September; 12 inches. A good rock plant for a semi-shaded position.

Its large trusses of white flowers are followed by brilliant orange-scarlet berries which remain on the plants throughout the winter. Strong pot-grown plants, 15 inches high, **75c** each.

Vitex—Chaste Tree

Macrophylla. In general habit similar to V. Agnus-castus but much stronger in all parts, the foliage being larger while the trusses of rich lavender-blue flowers are fully double the size. It blooms from July until frost, and is likely to become as popular as the Butterfly Shrub. Field-grown plants, two-year-old. **$3.50** per doz.; **$25.00** per 100.

Plant Department

Garden, Greenhouse, and Decorative Plants

The Dreer plant department is a very important and extensive division of our business. We doubt that there is any other commercial grower in this country who produces so many different species and varieties for florists' use. Those who have visited our greenhouses at Riverton, N. J., or have bought plants from Dreer, know well the quality of the stock we supply. May we extend to you and your associates a cordial invitation to take the first opportunity to visit our Riverton establishment in order to see for yourself the beautiful stock of plants offered on these pages. You will find a visit to the Riverton greenhouses not only most enjoyable but also highly educational. Besides the greenhouses, however, there are many other features that will interest the commercial florist. No matter what time of the year you come there always are many things worth while seeing.
